# Essential Power Control EPack<sup>TM</sup> Lite-1PH Compact SCR Power Controllers

Simplicity Without Compromise On Performance

#### Product at a Glance

The end user, the machine builder or the system integrator expects the best solutions in term of performance, ease of use and reliability in order to control the energy delivered to their process.

Whether replacing an existing product or building a new process, the EPack<sup>TM</sup> Lite power controller has been carefully designed to aid easy and fast integration in industrial systems.

The EPack Lite range offers a simplified choice, fast commissioning without any compromise on performance in order to provide a high level of quality, accuracy and reliability to the process.

More than just a product, EPack Lite power controllers bring a tailored solution based on more than 50 years of Eurotherm expertise.

> See EPack<sup>™</sup> compact SCR power controllers brochure HA031554 to discover how the full EPack range can add value to your business

The EPack Lite-1PH controller provides control of single phase non variable resistive or primary transformer loads. It combines simplicity of setup and operation in a compact format.

The combination of advanced configurable firing modes allows close matching to load characteristics to optimise process efficiency.

Key Features:

- Nominal load current from 4 to 125 amps
- Voltage up to 500V
- Compact DIN Rail and bulkhead mounting
- Configurable via front panel
- Fast start up with 'Quick Start' or 'Clone Code' features
- $V^2$  or  $I^2$  control or Open loop
- Controls non variable resistive and primary transformer loads
- Wide range of firing modes: Logic, Phase Angle, Adjustable Burst Firing, Fast Cycle
- Measurements: Current, voltage or impedance and more
- Load fault detection up to 1 element of 6
- SCCR 100kA with fuse

#### **Order Codes**

The EPack Lite power controller is ordered using a short code for the chargeable options and an extended option configuration code for commissioning.

If the extended code is not used, the software configuration is completed using a quick start procedure.

Current rating of EPack Lite controllers may be upgraded at any time using a software key order code.
